

OUR COMPLETE RANGE OF OCEAN SAILING CATS

Presenting nine great new catamaran designs in three styles, Barefoot, Raku and Flying Fish. We believe this is the most up to date, the most comprehensive and best thought out range of catamaran designs available anywhere.

What these designs share in common.

- No relics from the history books here. Barefoot, Raku and Flying Fish all encompass modern style and the latest in cost effective lightweight construction technology that makes them much lighter than most production cats and far more cost effective to build than most custom designs.
- They're all built on 30 years of experience designing Australia's leading production and custom cruising cats.They're all built on detailed electronic models that allow us to share accurate design data with engineers, materials suppliers, rig builders and sail makers with an eye to current and future technologies.
- They're all built on 30 years of experience working, sailing and socialising with our builders and our customers and learning what features will enhance your experience under sail or simply living aboard.
- They can all be built to detailed plans and specifications by the professional builder of your choice or under your own skills and management.
- Raku and Barefoot both offer a range of layout options and a choice between fixed keels and daggerboards. Flying Fish narrows down the layout options in the interest of simplicity, light weight and performance. For Flying Fish daggerboards are the preferred choice.

BAREFOOT brings great cruising in boat with true blue water capability. Set it up for charter, family cruising or liveaboard. Barefoot can be built to CE or other category of certification. Barefoot 40 and 45 have both had recent design updates updates with longer hulls, modifications for easier construction and bigger forward facing windows in the saloon.

MODELS; 40 and 45

RAKU amps up the performance stakes with the mast 5% further aft at the 45% position and a lighter displacement for length. Raku is a high performance cruiser that can take you around the world in style.

MODELS: Raku 43, 48, 54, 60

FLYING FISH features leek lines and the accent squarely on high performance, efficiency and travelling light.

MODELS Flying Fish 45,52, 60

BAREFOOT

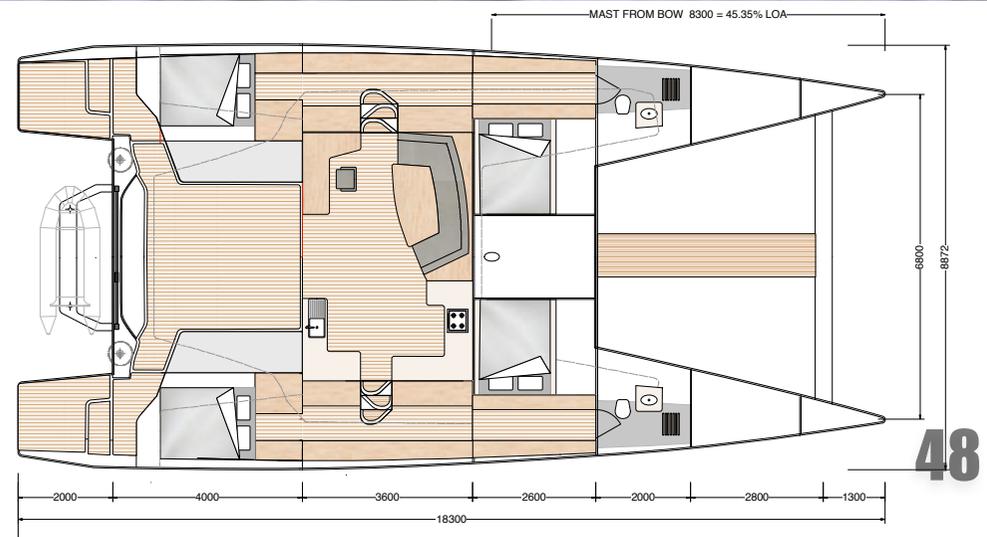

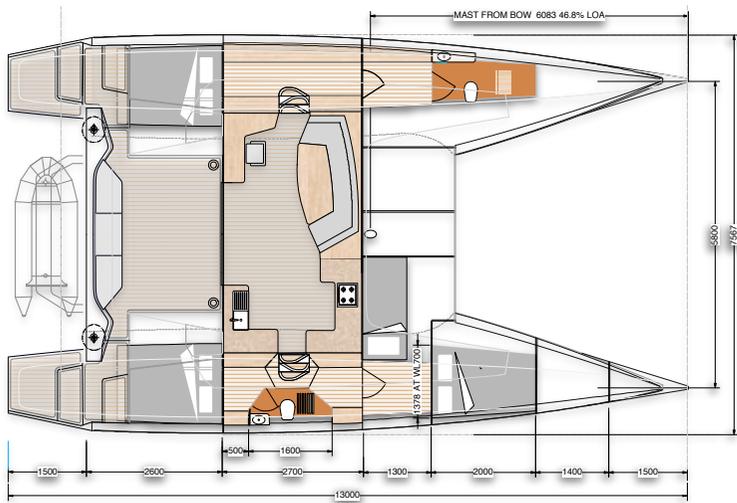

Cross oceans to exotic cruising grounds and share your adventure with family and friends.

Barefoot cats are our premier cruising designs.

They're designed for ocean crossing capability with good wingdeck clearance and fine performance characteristics.

Currently available in two models; Barefoot 40 and Barefoot 45, each with a range of layout options and a choice of fixed keels or daggerboards.

RAKU

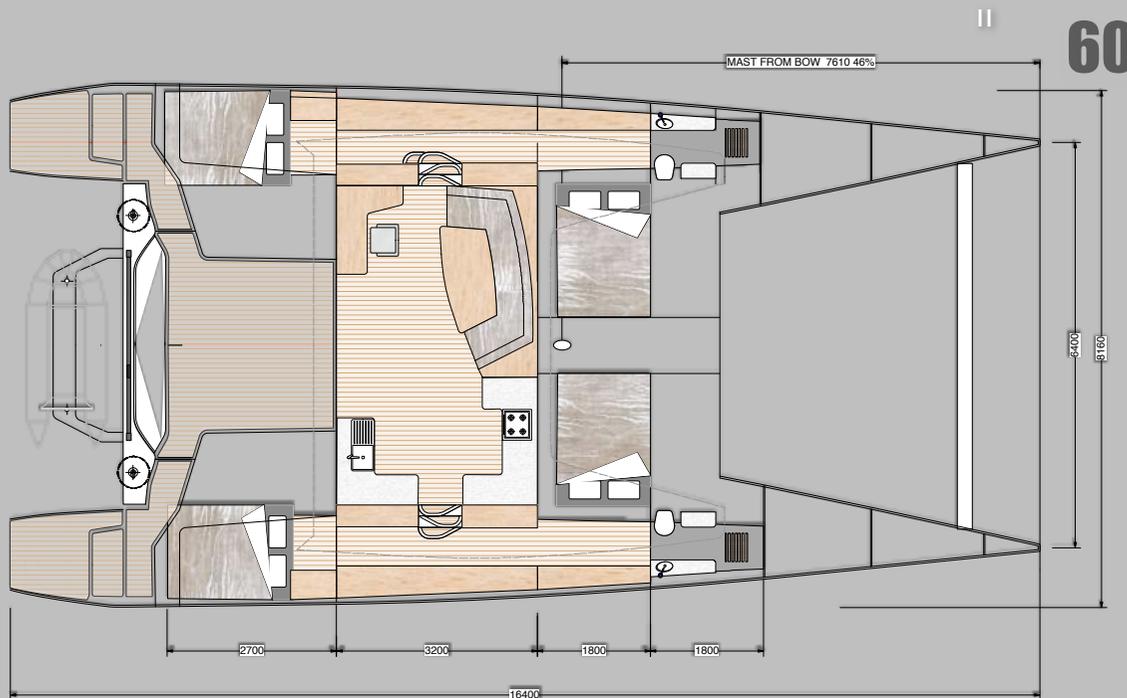

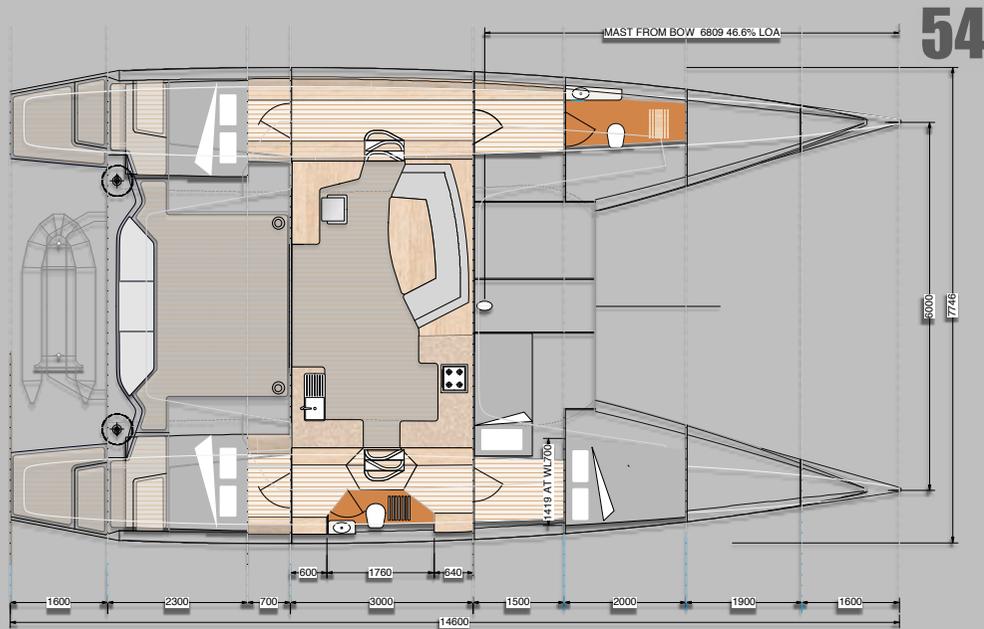

If high performance sailing is an important element in your cruising agenda then Raku is almost certainly the fix for you.

The Raku range is built on the same blend between performance and cruising amenity that made boats like the Chincogan 52 legendary for their ability to make fast effortless crossing and yet still provide a comfortable base station in your chosen marine environment.

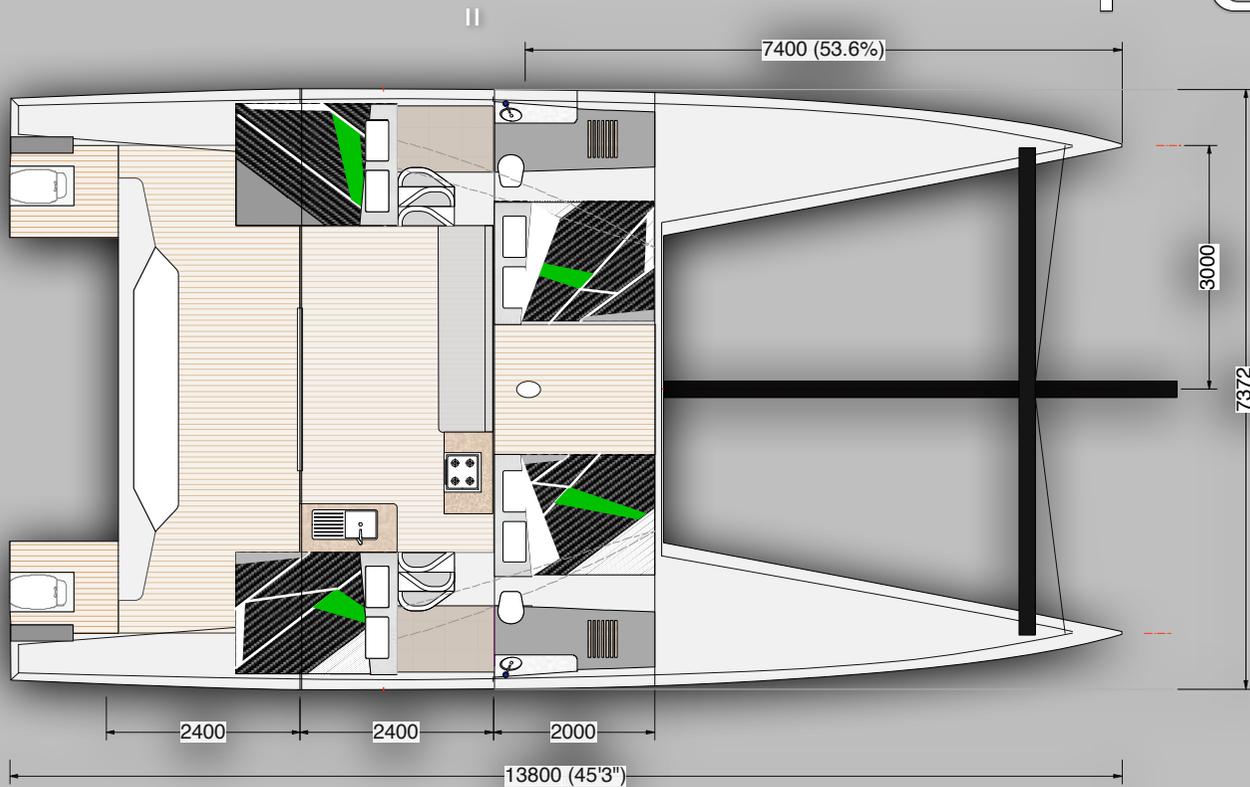

Raku is available in four models, 43, 48, 54 and 60

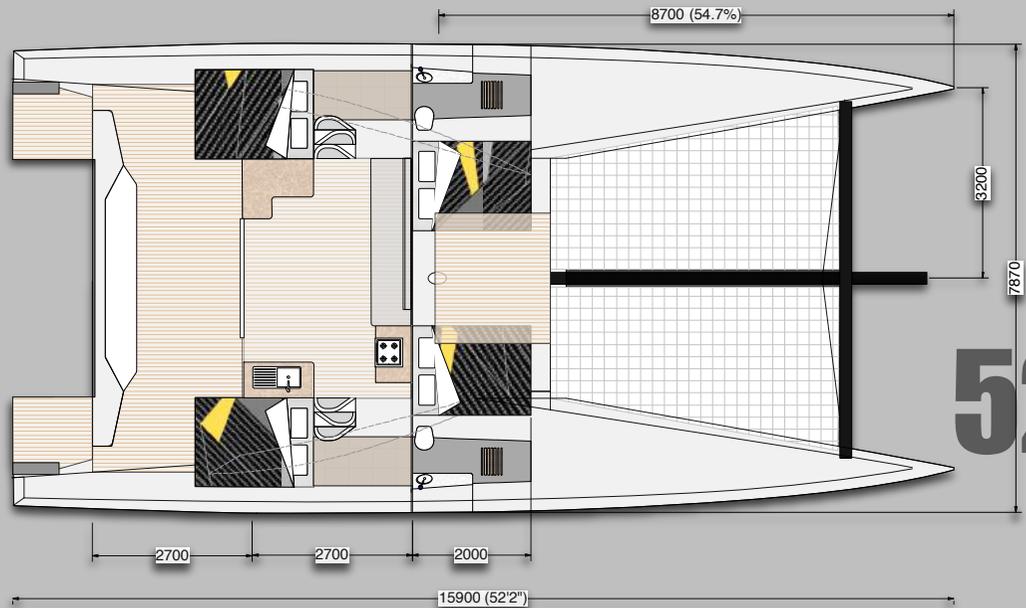

FLYING FISH

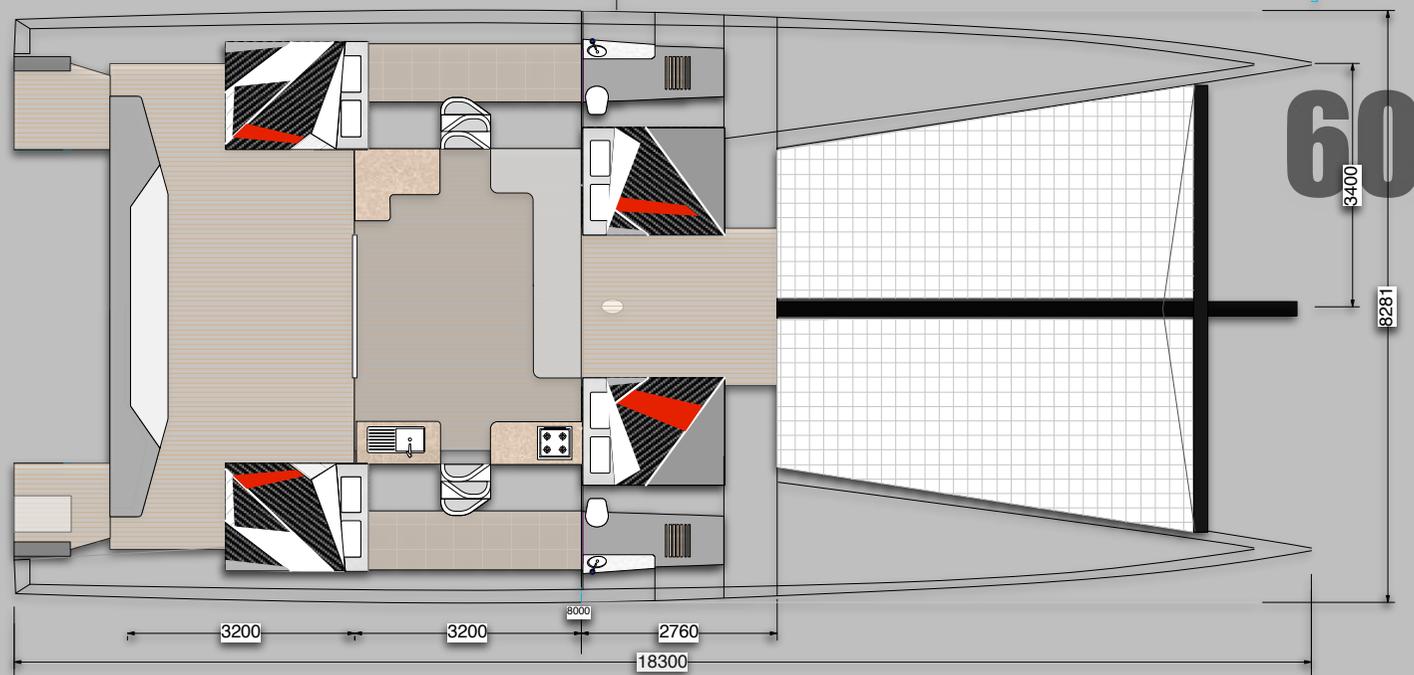

45

The Flying Fish range puts the accent squarely on performance and efficiency for racing or effortless long distance cruising. Flying Fish is available in three models. 45, 52 and 60 feet LOA.
